

Keysight InfiniiVision 1000 X-Series Oscilloscopes

Quotes from Worldwide Distribution Partners

Teit Poulsen, Director, Altoo Measurement Science

“Visualizing electrical signals to understand both timing and voltage relationships is one of the most important sources of insight for the electrical engineering community. Keysight’s new 4-channel InfiniiVision 1000 X-Series oscilloscopes provide the highest level of signal insight and functionality at an unprecedented low price point, while retaining the legendary Keysight quality. This allows more engineers greater insight in the behavior of their electrical designs.”

Jay Wimsatt, Director of Product Management, Newark element14

“Noting the success we’ve experienced with the 2-channel InfiniiVision 1000 X-Series, we are excited by the opportunity to launch the highly anticipated 4-channel models. Standard features and available options, accompanied by Keysight pedigree, mark a welcome entry into the sub \$1,000 price range. Whether a novice or experienced user, the straightforward, intuitive front panel allow stress free application immediately upon unboxing. The 1000 X-Series is at home in environments including education, research and development, Q/A, maintenance and repair, while still achieving a price point that will attract the serious makers and hobbyist.”

Jim Smith, Vice President Marketing, TestEquity

“Keysight’s continued innovation enables TestEquity to deliver leading test solutions to our customers. From research and development to educational labs to manufacturing, the 1000 X-series offers an affordable, versatile and easy-to-use scope with the professional measurements to address evolving test requirements.”

Jet Lee, Sales Manager, Hold Precision Technology Co Ltd

“The InfiniiVision 1000 X-Series from Keysight delivers better quality and features with a great price.”

Vincent Chien, Sales General Manager, Coretek Technologies

“With six instruments in one, Keysight’s 1000 X-Series is an unbelievably economic instrument. It is a miniature scope with more functionality. Customers might not have a better option for a 4-channel scope.”

Ricky Tseng, Sales General Manager, Pinskyun Technologies

“Keysight’s 1000 X-Series is a valuable product with an improved price, including new branding, design, and easy portability.”

Jason Park, CEO, Jays

“Keysight’s InfiniiVision 1000 X-Series is shockingly fresh to customers who think Keysight’s oscilloscopes have good performance but are too expensive. We will be able to talk to a wide range of customers with the 200 MHz and 4-channel 1000 X-Series. The 1000 X-Series is expected to serve an important role in various areas like small and medium sized companies with limited investment budgets, as well as in the education market needing to set up higher quality teaching labs. It also represents that Keysight always listens to various needs of their customers.”

Yong-Won Jung, General Manager, ATM

“The InfiniiVision 1000 X-Series from Keysight is a 9.8 out of 10. The 4-channel model at a reasonable price satisfies the needs of education labs (IoT, embedded and electrical circuit test) completely. The 1000 X-Series introduction is great news for customers who typically have budget constraints but need a 4-channel scope. Customers’ satisfaction will be quite high.”

JianKang Xia, General Manager, Qingdao Luxin Instrument Co Ltd

“The new InfiniiVision 1000 X-Series from Keysight offers the same user interface and front panel layout as industrial scopes. It meets education customer requirements for LAN connectivity and Bode test and fits the needs of start-up companies with 4-channel capabilities.”

Yonggang Yang, Business Development Manager, Beijing Oriental Jicheng Co Ltd

“Keysight’s InfiniiVision 1000 X-Series offers cost effective performance with 6-in-1 instrument integration in a small form factor.”

Qingming Zhang, East China Sales Manager, Beijing Oriental Jicheng Co Ltd

“Keysight’s InfiniiVision 1000 X-Series is a powerful tool to enable education customers. It is a low-end scope market changer, providing industrial standards at an educational price.”

Xinquan Fan, General Manager, Beijing Miko Xinye Electronics Technology Co Ltd

“Keysight’s InfiniiVision 000 X-Series is a real foundational oscilloscope for education and basic test needs, offering complete functions and outstanding performance. The wave generator and training signals are attractive for education customers.”

WangJia, Sales Manager, Shanghai Jingce Electronic Co Ltd

“Keysight’s InfiniiVision 1000 X-Series fills a gap in the low-end market with 4-channels and increased bandwidth to a competitive 200 MHz. Added LAN connectivity enhances the diversity of the offering. It is a very cost-effective product that will enable education customers.”
