

Keysight Technologies Statement on SW End User License Agreement (EULA)

Why is Keysight changing the SW EULA?

At Keysight we value and appreciate your feedback. Keysight periodically updates its Software End User License Agreement (EULA) to stay current with technology and industry best practices. Keysight issued a new EULA effective November 1, 2018. The intent of Keysight's EULA is to preserve software value for licensed users by discouraging software piracy and unlicensed use. This allows Keysight to continually develop and improve its software. The terms of the EULA should not pose a concern to licensed users.

A copy of the Keysight SW EULA can be found at [End User License Agreement \(EULA\)](#)

Note for Keysight employees only:

If you have further questions or clarifications about the EULA, please contact June Bouscaren in Keysight Legal.
