

Effective: 01 October 2018

Keysight Technologies, Inc.
Statement on New FAR Requirement (52.204-23)

**Prohibition on Contracting for Hardware, Software, and Services Developed
or Provided by Kaspersky Lab and Other Covered Entities**

On October 1, 2018, a new Federal Acquisition Regulation (FAR 52.204-23) came into effect which prohibits contractors from providing any hardware, software, or services developed or provided by Kaspersky Lab or its related entities, or using any such hardware, software, or services in the development of data or deliverables first produced in the performance of a contract.

In response to this new regulation, Keysight has taken immediate action to assess the potential impact on our supply chain. We have confirmed that no active Keysight products include Kaspersky parts or product. Additionally, we are communicating with our suppliers to ensure their compliance with this new requirement.

Keysight will continue to monitor the impact of this new FAR requirement and share additional information as appropriate.

For additional information or assistance, please contact [Keysight](#).

This policy is approved by Keysight's executive management and applies to Keysight operations worldwide.
